EDUCATION

University of Minnesota – Twin Cities

B.S. Computer Science & Data Science

Minneapolis, MN

Sept 2025 – May 2027

Normandale Community College

A.S. Computer Science | GPA: 3.7 | Phi Theta Kappa Honor Society

Bloomington, MN

Aug 2022 – May 2025

RESEARCH EXPERIENCE

Artificial Intelligence Researcher

May 2026 – Present

University of Minnesota, Dept. of Computer Science & Engineering

Minneapolis, MN

- Conduct AI-driven research on machine learning algorithms, data analysis, and computational problem-solving in collaboration with faculty researchers and graduate peers
- Apply supervised and unsupervised ML techniques to research datasets; contribute to experimental design, model evaluation, and technical documentation

Undergraduate Research Assistant – Networking, Mobile & AI Research Lab

Jan 2026 – Present

University of Minnesota

Minneapolis, MN

- Develop material classification models in Python using ROS2 on synchronized camera and LiDAR sensor data to improve cross-scene generalization for autonomous systems
- Train and evaluate deep learning models on multi-modal sensor fusion datasets; contribute to autonomous vehicle perception pipeline integration

AI Fellowship

Dec 2025 – Present

Handshake

Remote

- Selected for a competitive AI/LLM fellowship; applying large language model techniques to real-world problems in career services and talent platform optimization

WORK EXPERIENCE

Product Manufacturing Engineer Intern

June 2025 – Sept 2025

Abbott Laboratories

Plymouth, MN

- Applied data analysis (Excel, Minitab) to identify process bottlenecks and drive Lean/Six Sigma improvement initiatives; managed ECOs and BOMs in PTC Windchill PLM

IT Service Desk Team Lead

Sept 2023 – June 2025

Normandale Community College

Bloomington, MN

- Resolved 70+ support tickets weekly via TeamDynamix for 5,000+ campus users; supervised junior technicians and maintained campus computer lab infrastructure

PROJECTS

NeuroForge AI – ML SaaS Dashboard | Python, FastAPI, PostgreSQL, React, scikit-learn, XGBoost, Docker

- Built a full-stack ML SaaS platform with automated model training (Random Forest, XGBoost, Gradient Boosting), real-time inference, model analytics (F1, ROC-AUC, confusion matrix), JWT auth, Stripe billing, Docker + Kubernetes + Terraform infra, deployed Vercel/Railway

Humanizer – AI Text SaaS | Python, FastAPI, React, OpenAI API, PostgreSQL, Stripe

- Developed a full-stack SaaS app that rewrites AI-generated text across 9 styles using OpenAI API; implemented JWT auth, usage-based rate limiting, Stripe Pro subscription (\$9.99/mo), deployed on Render + Vercel

LLM Workflow Automation | Python, LangGraph, OpenAI API, FastAPI

- Built a stateful agentic pipeline using LangGraph that classifies support tickets, generates GPT-powered responses, and manages multi-turn context via JSON memory graphs

Weather Now | TypeScript, Next.js, React, Open-Meteo, Leaflet, Vercel

- Production weather app with live radar overlays, 7-day forecasts, real-time AQI, server-side API proxy; deployed on Vercel with CI/CD via GitHub Actions

TECHNICAL SKILLS

Languages: Python, Java, C, C++, JavaScript, TypeScript, SQL, OCaml, HTML/CSS, Bash

AI/ML: PyTorch, TensorFlow, scikit-learn, XGBoost, LangChain, LangGraph, OpenAI API, Hugging Face, ROS2, RAG, LLM Fine-Tuning

Data: Pandas, NumPy, Matplotlib, Apache Spark, Power BI, Tableau, ETL Pipelines, SQL Optimization

Web/Cloud/DevOps: FastAPI, React, Next.js, Node.js, REST APIs, Docker, Kubernetes, Terraform, AWS (EC2/S3/Lambda), GitHub Actions, CI/CD

Leadership: President – Coding Club | Vice President – Chess Club | Phi Theta Kappa Honor Society
